

Educational Transformations: Leadership, Culture and Technology

Roundtable Theme and Objectives: The School of Education (UQ), The HEAD Foundation (Singapore) and *Universitas Negeri Jakarta* (State University of Jakarta) are embarking on an Education Roundtable. This one day roundtable entitled “**Educational Transformations: Leadership, Culture and Technology**” showcases the highlights of the transformational action plans that were initiated during the six-month Professional Development programme undertaken by eighteen (18) school leaders who were the inaugural participants of the Certificate in Educational Studies in Leadership (CESL) programme. We intend to learn from the rich experiences of the participants and also to critically interrogate the interface of leadership, culture and technology in pursuing educational transformations. Findings from the roundtable discussions will be disseminated through a blogsite, selected media sources and an edited book or special issue of a journal.
